

Apache Installation And Web Page Designing

- 1) Starting apache server using command prompt & successful appearance of the web page:

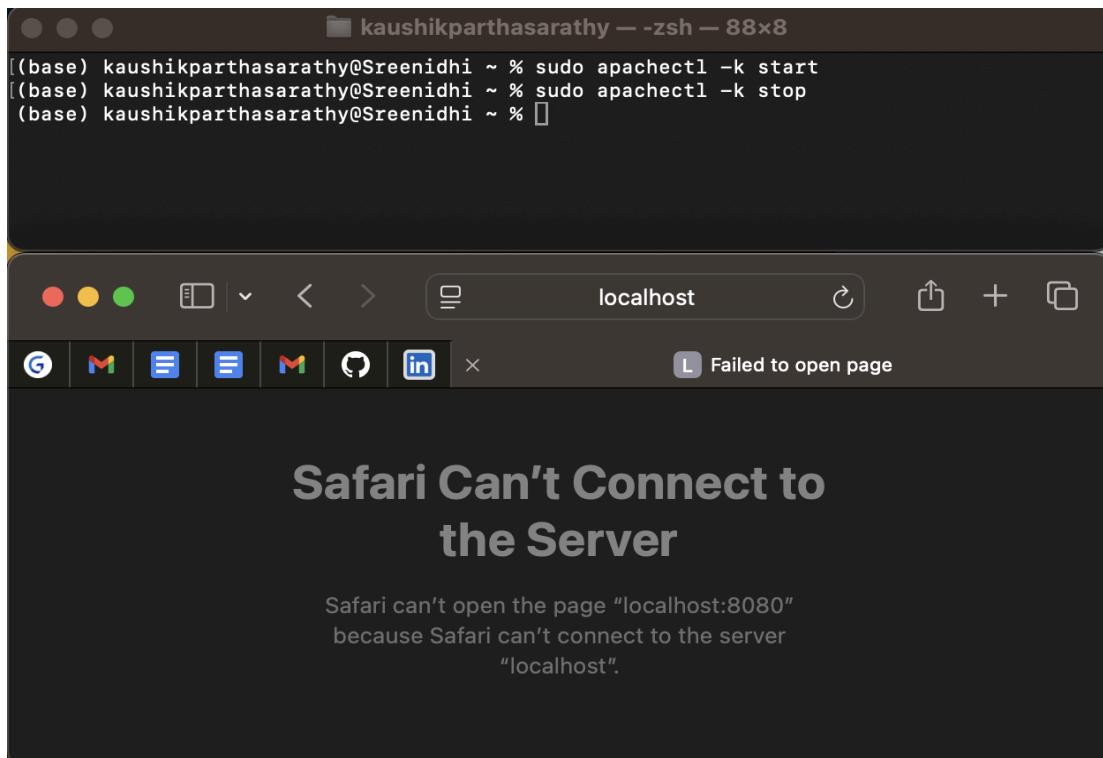

The screenshot shows a Mac OS X desktop environment. At the top, there's a dark menu bar with three dots on the left and a folder icon labeled "kaushikparthasarathy — -zsh — 88x8" on the right. Below the menu bar is a dark terminal window with white text. The text inside the terminal is:

```
(base) kaushikparthasarathy@Sreenidhi ~ % sudo apachectl -k start
(base) kaushikparthasarathy@Sreenidhi ~ %
```

Below the terminal is a dark Safari browser window. The address bar says "localhost". In the bottom right corner of the browser window, it says "localhost:8080". The main content area of the browser displays the text "It works!".

It works!

- 2) Screenshot of apache stopping using command prompt and localhost:8080 stoping.

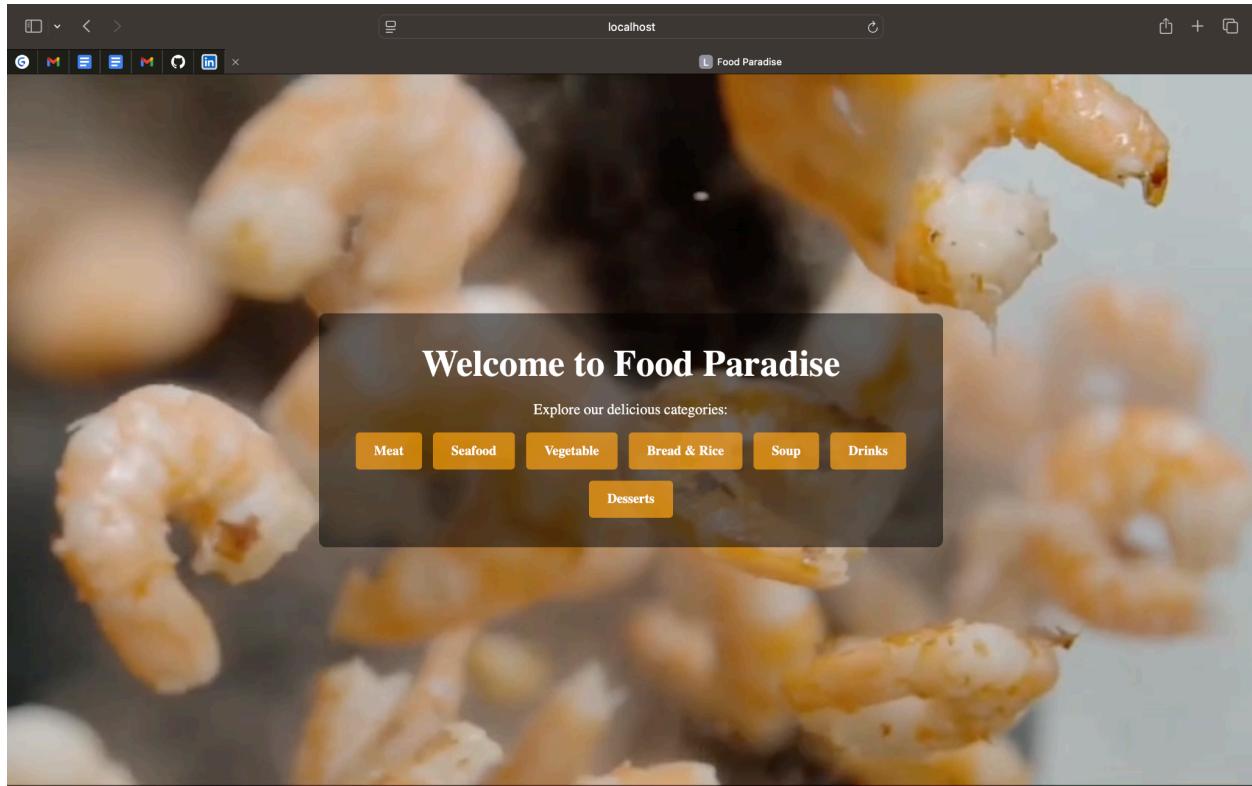

The screenshot shows a Mac OS X desktop environment. At the top, there's a dark menu bar with three dots on the left and a folder icon labeled "kaushikparthasarathy — -zsh — 88x8" on the right. Below the menu bar is a dark terminal window with white text. The text inside the terminal is:

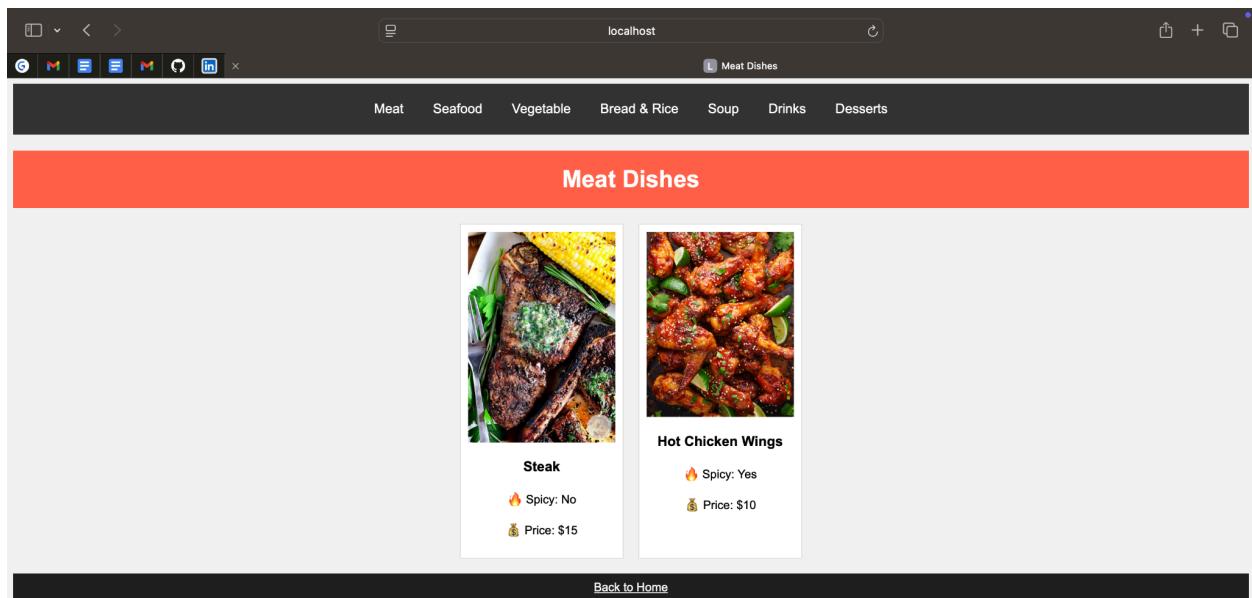

```
(base) kaushikparthasarathy@Sreenidhi ~ % sudo apachectl -k start
(base) kaushikparthasarathy@Sreenidhi ~ % sudo apachectl -k stop
(base) kaushikparthasarathy@Sreenidhi ~ %
```

Below the terminal is a dark Safari browser window. The address bar says "localhost". In the bottom right corner of the browser window, it says "Failed to open page". The main content area of the browser displays the text "Safari Can't Connect to the Server". Below that, it says "Safari can't open the page "localhost:8080" because Safari can't connect to the server "localhost".
